Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 18 June 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

The abstract of the disclosure is objected to because it is not commensurate with the scope of the claimed invention. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 6, 8, 9, 10, 11, 14, 15, 16 and 17 are rejected under 35 U.S.C. 102(e) as being anticipated by Whelan 5,918,604. The patent to Whelan discloses each of the following limitations recited in the above claims: flexible member 30 for positioning in a bone tunnel; a flexible member delivery device 12 and a pulling member 12 having hook 18. Each of the elements is capable of performing the recited functions. Elements 74 are considered pulling members capable simultaneously extracting the flexible member.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3731

Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Whelan in view of Clark et al (US Patent 5,266,075). The patent to Whelan suggests the use of an arthroscope in association with an anterior cruciate system. It is well known in the art to provide arthroscopes with anterior cruciate system to aid in visualization of the procedure. It would have been obvious to one having ordinary skill in the art to utilize an arthroscope with Whelan's system.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 6-13 are rejected under the judicially created doctrine of double patenting over claims 5-11 of U. S. Patent No. 6,610,064.

The subject matter -a system for securing a graft ligament in a bone tunnel, said system comprising: a flexible member for positioning the graft ligament in the bone tunnel; a flexible member delivery device having an end for positioning the two ends of said flexible member in the bone tunnel; and a pulling member having an end for withdrawing one end of said flexible member from said delivery device positioned in the bone tunnel and pulling that end of said flexible member through a portion of a second bone tunnel that intersects, and extends traverse to, the first-mentioned bone tunnel.

Art Unit: 3731

The patent not provides protection for the claims of the patent but also extends patent coverage to the system of the present invention. The claims of the present application because of the phrase "comprising" not only would provide patent protection for the claimed system already disclosed and covered by the claims of the issued patent. Thus, the controlling fact is that the present patent protection for the system, fully disclosed in and covered by the claims of the patent, since the claims if allowed would improperly extend the "right to exclude" already granted in the patent.
